

INTERNET DOMAIN MANAGEMENT

Didn't know your Internet domain name was expiring and now you have no email or website?

Team Networks can assist your business with Internet domain name registration and management. Domain name management can be confusing and mistakes can be catastrophic. Failing to renew your domain name on time will result in loss of email services and possibly your entire website. Additionally, someone could register your expired name and hold it for ransom.

Team Networks can register domains, configure email services for your registered domains, keep track of renewals and monitor your domain names to ensure they are not blacklisted which can cause major disruptions to your email services.

Why risk it? Team Networks has the expertise to keep your Internet presence and email services safe.
